CAREER SUMMARY

MCA final-year student with a strong foundation in Java development, including back-end and basic front end technologies, along with a growing interest in AI. Seeking an entry-level software developer role to build scalable applications and apply problem-solving skills in a dynamic environment.

TECHNICAL SKILLS

Java | C - Programming Language | Spring and Spring Boot | HTML, CSS and Java Script(Fundamentals) | MySQL | API Testing(POSTMAN) | DSA (Fundamentals) | Git, GitHub

PROJECTS

HOSTEL MANAGEMENT API – SPRING BOOT | SPRING DATA JPA | MYSQL

Hostel Management API is a RESTful Java Full Stack application that manages hostel operations, including blocks, wings, and rooms. It ensures data integrity, enforces room capacity, and supports secure student management with scalable API design.

- Developed RESTful APIs for managing hostel blocks, wings, and rooms using Spring Boot and Spring Data JPA.
- Designed and implemented a MySQL database schema to ensure efficient data management and future scalability.
- Applied input validation and custom exception handling, reducing invalid API requests by 40%.
- Enforced data integrity through unique student ID validation and room capacity constraints.
- Tested APIs using Postman and optimized design for scalability, security, and maintainability following best practices.

TO-DO LIST APP – SPRINGBOOT | SPRING DATA JPA | MYSQL | SPRING SECURITY | SPRING DATA JPA | MYSQL | SPRING SECURITY

- Developed and optimized 10+ RESTful CRUD APIs using Spring Boot, Spring Data JPA, and MySQL, ensuring scalability and maintainability.
- Implemented secure authentication and authorization using Spring Security with role-based access control (Admin/User).
- Applied input validation and custom exception handling, reducing invalid API requests by 40% and improving reliability.
- Designed a modular layered architecture (Controller-Service-Repository) and performed API testing using Postman, following full-stack development best practices.
